
a
centrosymmetric crystal
open circle: inversion centre
arrows: r → −r
I·x = x and e → −e
so e = −e, and e = 0
b
the only difference
O(3)
0e
1o
2e
3o
natural parity (−1)^l
erase the labels
SO(3)
0e
1e
2e
3e
every degree declared even
architecture, data, splits, seeds:
identical
c
true value: exactly 0
physically impossible
a real piezoelectric
detection threshold
structurally zero
predicted ‖e‖_F (C m^−2)
10^1
10^−1
10^−3
10^−5
10^−7
O(3)
SO(3)
NequIP, n = 2,000 crystals
